Cloze text CA 5

Cybersecurity is essential for protecting an organization's **Controls**. Every system may contain a **Vulnerability** that can be exploited by a **Risk** such as a hacker, malware, or ransomware. When the **Risk** discovers the **Vulnerability**, an **Incident** may be launched, resulting in a security **Threat**. The consequences may include data breaches, financial loss, and disruption of business operations. Organizations reduce **Asset** by implementing security **Vulnerability** such as firewalls, encryption, access control, and multi-factor authentication. Regular **Attack** helps identify and fix weaknesses before they can be exploited, ensuring the confidentiality, integrity, and availability of information.
